**ALLSTONE**

QUARRIERS OF NATURAL

VT BUILDING STONE

The timeless beauty  
of natural dimensional  
Vermont Granite.

In the heart of Vermont's Green Mountains is the charming town of Chester. This historic stone village, standing now for over 200 years, is known for its unique stone buildings. These homes, schools, and churches are hewn from local granite that not only gives them an enduring beauty but a proven protection from Vermont's harsh winters and hot summer days.

Unlike most stone manufacturers, Allstone operates its own quarries, with three of them around the historic town of Chester. You benefit from our unique ability to control quality and consistency from the mountains of Vermont all the way to your installation.

Ashlar

# CHESTER

## THINSTONE COLLECTION

Medium gray and blue granite with an occasional white quartz accent stripe running through the face.
